## **PRESS RELEASE**

WITTMANN BATTENFELD do Brasil

### **New building for WITTMANN BATTENFELD do Brasil**

***The team of WITTMANN BATTENFELD do Brasil moved to a new site at the beginning of August this year. The new building in Vinhedo (State of São Paulo) has a floor space of 850 m<sup>2</sup> und thus offers enough room for optimal support to local customers.***

Brazil has been the most important market for the WITTMANN Group in South America for many years. This is why the WITTMANN Group has made a special point of providing its Brazilian subsidiary with adequate facilities for customer support. Since its customers are becoming more and more interested in complete systems and consequently in commissioning entire work cells, the space in the previous building became too confined. Therefore WITTMANN BATTENFELD do Brasil looked for new premises.

Due to the challenging situation caused by Covid-19, the relocation of the WITTMANN BATTENFELD team, originally planned for March this year, was delayed. But at the beginning of August it finally happened. The team of WITTMANN BATTENFELD do Brasil can now be reached at the following address:

WITTMANN BATTENFELD do Brasil Ltda  
Rua José Resende Meirelles  
3925 – Distrito Industrial Benedito Storani  
13.288-130 – Vinhedo-SP-Brasil  
Tel: +55 11 2511-8150  
[wittmann@wittmann-group.com.br](mailto:wittmann@wittmann-group.com.br)  
[www.wittmann-group.com.br](http://www.wittmann-group.com.br)

In addition to areas for offices and meetings, the new 850-square-meter building also includes space for storage, servicing, training programs and customer inspections. Thanks to their spacious layout, the new premises are now considerably more suitable than the previous site for presenting complete injection molding systems, i. e. injection molding machines fully equipped with automation and auxiliaries. Michael Wittmann, Managing Director of WITTMANN Kunststoffgeräte GmbH and co-owner of the WITTMANN Group, and Cássio Luís Saltori, Managing Director of WITTMANN BATTENFELD do Brasil, are both pleased about the new facilities and the

opportunities thus provided for even better service to customers in this region, which is so important for the Group.

### **The WITTMANN Group**

The WITTMANN Group is a worldwide leader in the production of injection molding machines, robots and auxiliaries for the plastics processing industry, headquartered in Vienna/Austria and consisting of two main divisions: WITTMANN BATTENFELD and WITTMANN. They jointly operate the companies of the group with eight production plants in five countries, and its additional sales and service companies are active with 34 facilities on all important plastics markets around the world.

WITTMANN BATTENFELD pursues the further expansion of its market position as an injection molding machine manufacturer and specialist for state-of-the-art process technologies. As a supplier of comprehensive, modern machine technology in modular design, the company meets both present and future market demands for plastics injection molding equipment.

The WITTMANN product portfolio includes robots and automation systems, material handling systems, dryers, gravimetric and volumetric blenders, granulators, temperature controllers and chillers. With this diversified range of auxiliaries, WITTMANN offers plastics processors solutions to cover all production requirements, ranging from independent production cells to integrated plant-wide systems.

The syndication of the various segments under the umbrella of the WITTMANN Group has led to complete connectivity between the various product lines, for the benefit of plastics processors with an increasing demand for seamless integration of processing machinery with automation and auxiliaries.
