Markus Wolfram is the new Head of Sales of WITTMANN Technology

As of August 1st 2022, Markus Wolfram was installed as Head of Sales of WITTMANN Technology in Vienna, the headquarters of the WITTMANN Group.

**Markus Wolfram, the new Head of Sales
of WITTMANN Technology.**

Markus Wolfram had started his professional career working for WITTMANN as a technician, and eventually had assumed the position of International Sales Manager for material handling systems. After having taken some insights into another branch of industry – the hot dip galvanizing sector – Markus has now returned to what interests him most: the plastics processing industry in its broadest sense – and hence his return to WITTMANN. In total, Markus has been with WITTMANN for 18 years. He will operate from the Vienna group headquarters and will report directly to the company management board.

Markus Wolfram states: “My new role within the company as Head of Sales allows me to get in touch with the most interesting innovations and products. In fact, that is always what I am on the look out for – and the exact same thing applies to

WITTMANN and its customers. The comprehensive product range of WITTMANN Technology covers robots, advanced automation solutions, and auxiliaries such as temperature controllers, material dryers, blenders, up to complete centralized material handling systems.”

Michael Wittmann, WITTMANN Technology President, expressed his great delight to have Markus Wolfram back on board as the new Head of Sales. He says: “Visit us at the K show in Düsseldorf, starting at October 19th in hall 12, booth F23. Meet your plastics processing equipment providers – and if you don’t know him already, get to know Markus Wolfram.”

The WITTMANN Group

The WITTMANN Group is a globally leading manufacturer of injection molding machines, robots and auxiliary equipment for processing a great variety of plasticizable materials – both plastic and non-plastic. The group of companies has its headquarters in Vienna, Austria and consists of two main divisions: WITTMANN BATTENFELD and WITTMANN. Following the principles of environmental protection, conservation of resources and circular economy, the WITTMANN Group engages in state-of-the-art process technology for maximum energy efficiency in injection molding, and in processing standard materials and materials with a high content of recyclates and renewable raw materials. The products of the WITTMANN Group are designed for horizontal and vertical integration into a Smart Factory and can be interlinked to form an intelligent production cell.

The companies of the group jointly operate eight production plants in five countries, and the additional sales companies at their 34 different locations are present in all major industrial markets around the world.

WITTMANN BATTENFELD pursues the continued strengthening of its market position as a manufacturer of injection molding machines and supplier of comprehensive modern machine technology in modular design. The product range of WITTMANN includes robots and automation systems, material handling systems, dryers, gravimetric and volumetric blenders, granulators, temperature controllers and chillers. The combination of the individual areas under the umbrella of the WITTMANN Group enables perfect integration – to the advantage of injection molding processors with an increasing demand for seamless interlocking of processing machines, automation and auxiliaries.
