Efficient use of energy to save costs

You want to achieve your production goals with lowest possible energy costs? Then WITTMANN is your partner. We set new benchmarks for energy consumption figures in the industry and help you to combine sustainability with financial advantages. Discover how you can benefit from our energy-efficient injection molding machines.

Your economic advantages:

- » Reduction of power consumption
- » Cushioning of energy price rises
- » Lower CO₂ tax burden
- » Benefitting from local funding programs for energy-saving systems

Your contribution to sustainability:

- » Environment relief and climate protection
- » Economical use of valuable resources
- » Positive influence on CO₂ footprint

Efficiency comparison with competitors

Measure us!*

Our promise: your new SmartPower or EcoPower is the most energy-efficient machine on the market. This is what our money back guarantee stands for, too.* Should you have a comparable machine with a better energy balance, we pledge to take our machine back free of charge. To help you calculate the difference, we grant you free use of our IMAGOxt measurement system for two machines.

Are you ready for the big energy efficiency check?

Your WITTMANN partner is looking forward to hearing from you.

* Promotion valid until March 31, 2024 for the SmartPower and EcoPower series, within Europe only.
